

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF ENGLAND

PARISH OF TATTINGSTONE

C^o SUFFOLK

EXPLANATORY REMARKS.

scale of the Parish Plans is the 1-2500th of the actual length on the ground and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, and is very approximately equal to one square inch to one acre, the square of each inch being equal to one acre.

Length of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; the number of towns and large villages encircled by a red band, one number and the number of acres are given for the portion within the red band, unless they are contained within than one parish, in which case a number is given for the portion included within the parish.

Braces [}] on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus —31'4".

Scale of the County Plans is 6 inches to a mile, and each sheet contains the whole of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

Dimensions of the sheets on the Six-inch scale being four miles by six miles and the area is twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 100, and 6 inches to a mile :—

Names	©	Hundreds or Wards	H
Antient or Mother.....	P	Civil Parishes or Townships	T
Parochial	E	Division of Townships	T
Municipal Wards.....	W		

Boundaries	<div> <div>ROMAN</div> <div> <div>Druidical or Saxon</div> <div>Norman or Subsequent</div> </div> </div>
------------------	--

The descriptions of the boundaries are shown by the following initials :—

Course of Stream	C.S.	Centre of Fence	C.F.
Course of Road	C.R.	Top of Cop	T.C.
Course of Stream or Drain ...	S.S. or S.D.	Centre of Wall	C.W.
Course of Hedge	R.H.	Defaced	Def.
Course of Wall	F.W.	Track of Stream.....	T.S.
Undefined.....	Und.		

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

When the fence or other boundary is also the boundary of a Parish or other Civil Division, and does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

- (1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.
- (2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

EXPLANATORY REMARKS.

Following are the Scales, &c., Characters of Writing and Boundary, Symbols, Variations, &c., used on the Ordnance Plans of $\frac{1}{2500}$, $\frac{1}{2500}$, and 6 Inches to 1 Mile, and present:—

SCALES, &c.

Scales shew how each Plan is numbered.		Description of Plan.	Area of each Sheet.		Dimensions represented.		Scale.	Remarks.
Parish.	Town.		Acres.	Sq. Miles.	Length.	Breadth.		
		County Plans						
		Full Sheet	15360	24	6 miles	4 miles	6 inches to 1 mile.	* N.W., N.E., S.W., S.E. according to the position of Quarter Sheet.
		Quarter Sheet	3840	6	3 miles	2 miles	Do. do.	
15		Parish Plans	960	14	1½ miles	1 mile	$\frac{1}{1250}$ of actual length on the ground, or 25·344 inches to 1 mile, or 3·157 chains to 1 inch.	The square of 1·0018 inch = an acre, or approximately 1 square inch on the plan represents 1 acre.
15	23	Town Plans	38·4	·06	24 chains	16 chains	$\frac{1}{1250}$ of actual length on the ground, or 10·56 feet to 1 mile, or 41·66 feet to 1 inch.	Some towns have been done on 10 feet, and some 6 feet, to 1 mile.

A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

ORDNANCE SURVEY OF ENGLAND

PARISH OF TRIMLEY ST MARTIN

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and one only are given for the portion within the red band, unless they are contained more than one parish, in which case a number is given for the portion included in each parish.

The Braces [] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus — 31' 4".

The Scale of the County Plans is 6 inches to a mile, and each sheet contains 36 sheets of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County Plans, the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names	Ⓒ	Hundreds or Wards	H
Parishes, Ancient or Mother.....	P	Civil Parishes or Townships	T
Extra Parochial	E	Division of Townships	T

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	C.S.	Centre of Fence	C.F.
Centre of Road	C.R.	Top of Cop	T.C.
Side of Stream or Drain ...	S.S. or S.D.	Centre of Wall	C.W.
Root of Hedge	R.H.	Defaced	Def.
Face of Wall	F.W.	Track of Stream.....	T.S.
Undefined.....	Und.		

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

- (1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.
- (2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF ENGLAND

PARISH OF TRIMLEY ST MARY

C^O SUFFOLK

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and only are given for the portion within the red band, unless they are contained more than one parish, in which case a number is given for the portion included in each parish.

The Braces [] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31'4.

The Scale of the County Plans is 6 inches to a mile, and each sheet contains sheets of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County Plans, the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales 1-2500, and 6 inches to a mile :—

County Names		Hundreds or Wards	
Parishes, Ancient or Mother.....		Civil Parishes or Townships	<i>T</i>
Extra Parochial		Division of Townships	<i>T</i>
Municipal Wards.....			<i>W</i>

Antiquities	<div style="display: inline-block; vertical-align: middle;"> <div style="font-size: 3em; vertical-align: middle;">{</div> <div style="display: inline-block; vertical-align: middle;"> <p>ROMAN</p> <p><i>Druidical or Saxon</i></p> <p><i>Norman or Subsequent</i></p> </div> </div>
-------------------	---

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	<i>C.S.</i>	Centre of Fence	<i>C.F.</i>
Centre of Road	<i>C.R.</i>	Top of Cop	<i>T.C.</i>
Side of Stream or Drain ...	<i>S.S.</i> or <i>S.D.</i>	Centre of Wall	<i>C.W.</i>
Foot of Hedge	<i>R.H.</i>	Defaced	<i>Def.</i>
Foot of Wall	<i>F.W.</i>	Track of Stream.....	<i>T.S.</i>
Undefined.....			<i>Und.</i>

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

- (1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.
- (2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

INDEX TO THE SHEETS

EXPLANATORY REMARKS.

Scale of the Parish Plans is the 1-2500th of the actual length on the ground and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, every approximately equal to one square inch to one acre, the square of each being equal to one acre.

Length of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each therefore 960 acres.

Enclosure has a reference number to the area which is given in this Book; of towns and large villages encircled by a red band, one number and are given for the portion within the red band, unless they are contained in one parish, in which case a number is given for the portion included in the parish.

Spaces [\] on the plans are to indicate that the spaces so braced are under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus — 31'4.

Scale of the County Plans is 6 inches to a mile, and each sheet contains six of the Parish Plans. There is therefore a double reference number to each of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

Dimensions of the sheets on the Six-inch scale being four miles by six miles or twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 6 and 2½ inches to a mile :—

Names	©	Hundreds or Wards	H
Ancient or Mother	P	Civil Parishes or Townships	T
Local	E	Division of Townships	T
Municipal Wards	W		
.....		ROMAN	
.....		Druidical or Saxon	
.....		Norman or Subsequent	

Descriptions of the boundaries are shown by the following initials :—

Stream	C.S.	Centre of Fence	C.F.
Road	C.R.	Top of Cop	T.C.
Stream or Drain ...	S.S. or S.D.	Centre of Wall	C.W.
Edge	R.H.	Defaced	Def.
Wall	F.W.	Track of Stream	T.S.
Undefined			Und.

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

The areas are computed to the centre of fence, or other boundary of the parish, except in the following cases :—

When the fence or other boundary is also the boundary of a Parish or other Civil Division, the area is calculated to the Parish or other boundary, the centre. The areas of the fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

of the Parish Plans is the 1-2500th of the actual length on the ground. The scale is equal to 25·344 inches to a mile, or 3·157 chains to an inch, and the area of each sheet is approximately equal to one square inch to one acre, the square of the scale being equal to one acre.

The length of each sheet is 1½ miles, and the breadth 1 mile, the area of each sheet therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; and of towns and large villages encircled by a red band, one number and reference are given for the portion within the red band, unless they are contained wholly within one parish, in which case a number is given for the portion included within the parish.

Spaces [] on the plans are to indicate that the spaces so braced are included under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus —31'4".

The scale of the County Plans is 6 inches to a mile, and each sheet contains 36 of the Parish Plans. There is therefore a double reference number to each enclosure of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles and containing twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 2½, 6, and 6 inches to a mile :—

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

B.—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

- 1. When the fence or other boundary is also the boundary of a Parish or other Civil Division, and does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.
- 2. The fences, &c., bounding either side of a railway are included wholly within its area.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

scale of the Parish Plans is the 1-2500th of the actual length on the land and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, very approximately equal to one square inch to one acre, the square of each being equal to one acre.

length of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each therefore 960 acres.

enclosure has a reference number to the area which is given in this Book ; of towns and large villages encircled by a red band, one number and are given for the portion within the red band, unless they are contained in one parish, in which case a number is given for the portion included in the parish.

spaces [\] on the plans are to indicate that the spaces so braced are under the same reference number.

altitudes in feet above the Mean Level of the Sea are written thus —31·4.

scale of the County Plans is 6 inches to a mile, and each sheet contains one of the Parish Plans. There is therefore a double reference number to each of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

dimensions of the sheets on the Six-inch scale being four miles by six miles or twenty-four square miles, equal to 15,360 acres.

following are the characters employed on the Ordnance Plans on the Scales of 6 and 2½ inches to a mile :—

Names	©	Hundreds or Wards	H

descriptions of the boundaries are shown by the following initials :—

Road	G.R.	Top of Cop	T.C.

Wall	F.W.	Track of Stream.....	T.S.
Undefined.....	Und.		

change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

The areas are computed to the centre of fence, or other boundary of enclosure except in the following cases :—

when the fence or other boundary is also the boundary of a Parish or other Civil Division, and does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

Fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

A R E A S.

Each enclosure has a reference number to the area which is given in this Book ; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

scale of the Parish Plans is the 1-2500th of the actual length on the land and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, very approximately equal to one square inch to one acre, the square of each being equal to one acre.

Length of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each therefore 960 acres.

Enclosure has a reference number to the area which is given in this Book; of towns and large villages encircled by a red band, one number and are given for the portion within the red band, unless they are contained in one parish, in which case a number is given for the portion included in the parish.

Spaces [] on the plans are to indicate that the spaces so braced are under the same reference number.

Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

Scale of the County Plans is 6 inches to a mile, and each sheet contains one of the Parish Plans. There is therefore a double reference number to each of the Parish Plans, as VI. 9., the first number referring to the County and the second number to the Parish Plans.

Dimensions of the sheets on the Six-inch scale being four miles by six miles and twenty-four square miles, equal to 15,360 acres.

Following are the characters employed on the Ordnance Plans on the Scales of 6 and 6 inches to a mile :—

Names	©	Hundreds or Wards	H
Ancient or Mother.....	P	Civil Parishes or Townships	T
Local	E	Division of Townships	T
Municipal Wards.....	W		

.....	ROMAN
.....	Druidical or Saxon
.....	Norman or Subsequent

Descriptions of the boundaries are shown by the following initials :—

Stream	C.S.	Centre of Fence	C.F.
Road	C.R.	Top of Cop	T.C.
Stream or Drain ...	S.S. or S.D.	Centre of Wall	C.W.
Edge	R.H.	Defaced	Def.
Wall	F.W.	Track of Stream.....	T.S.
Undefined.....	Und.		

When a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

The areas are computed to the centre of fence, or other boundary of enclosure except in the following cases :—

When the fence or other boundary is also the boundary of a Parish or other Civil Division, and does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

the Parish Plans is the 1-2500th of the actual length on the equal to 25·844 inches to a mile, or 3·157 chains to an inch, approximately equal to one square inch to one acre, the square of being equal to one acre.

of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each is 960 acres.

There has a reference number to the area which is given in this Book; towns and large villages encircled by a red band, one number and given for the portion within the red band, unless they are contained in the parish, in which case a number is given for the portion included.

[] on the plans are to indicate that the spaces so braced are in the same reference number.

as in feet above the Mean Level of the Sea are written thus —31'4.

of the County Plans is 6 inches to a mile, and each sheet contains the Parish Plans. There is therefore a double reference number to the Parish Plans, as VI. 9., the first number referring to the County and number to the Parish Plans.

ons of the sheets on the Six-inch scale being four miles by six miles twenty-four square miles, equal to 15,360 acres.

ing are the characters employed on the Ordnance Plans on the Scales of 6 inches to a mile :—

ORDNANCE SURVEY OF ENGLAND

PARISH OF WANTISDEN

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 28·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 10018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained more than one parish, in which case a number is given for the portion included in each parish.

The Braces [] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the County Plans is 6 inches to a mile, and each sheet contains 6 sheets of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County Plans, the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	H
Parishes, Ancient or Mother.....	P	Civil Parishes or Townships	T
Extra Parochial	E	Division of Townships	T
Municipal Wards.....	W		

Antiquities	<div> <div>ROMAN</div> <div>Druidical or Saxon</div> <div>Norman or Subsequent</div> </div>
-------------------	---

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	<i>C.S.</i>	Centre of Fence	<i>C.F.</i>
Centre of Road	<i>C.R.</i>	Top of Cop	<i>T.C.</i>
Side of Stream or Drain ...	<i>S.S.</i> or <i>S.D.</i>	Centre of Wall	<i>C.W.</i>
Root of Hedge	<i>R.H.</i>	Defaced	<i>Def.</i>
Face of Wall	<i>F.W.</i>	Track of Stream.....	<i>T.S.</i>
Undefined.....	<i>Und.</i>		

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—to convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 18 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and only are given for the portion within the red band, unless they are contained more than one parish, in which case a number is given for the portion included in each parish.

The Braces [] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the County Plans is 6 inches to a mile, and each sheet contains sheets of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County sheet, the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales 1-2500, and 6 inches to a mile :—

County Names		Hundreds or Wards	
Parishes, Ancient or Mother.....		Civil Parishes or Townships	<i>T</i>

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

- (1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

A R E A S.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.	C. Tk. F. Centre of Track of Fence, Furrow, &c.
C. C. D. Centre of Covered Ditch or Drain.	F. S. F. Face of Sunk Fence.
C. H. - Centre of Hedge, Harbour, &c.	F. S. W. Face of Sea Wall, or Sunk Wall.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.	F. W. - Face of Wall.
C. S. L. W. Centre of Stream at Low Water.	Tk. D. - Track of Ditch or Drain.
	Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.
